

1. **Safe Division:** Ask for two integers(x, y). Print the result of x / y if $y \neq 0$. If $y == 0$, print "Cannot divide by zero".
2. **Largest of Three:** Ask for three integers a, b, c . Print the largest one. Use only two if statements (no elif, no max()).
3. **Ticket Price Calculator:** Ask for age.
 - Under 5 $\rightarrow$ "Free"
 - 5-12 $\rightarrow$ "\$5"
 - 13-64 $\rightarrow$ "\$12"
 - 65 or older $\rightarrow$ "\$8" Print the price.

semicolon

4. **BMI Category**: Ask for weight (kg) and height (meters).

Compute $\text{bmi} = \text{weight} / (\text{height} * \text{height})$ Then print:

- $< 18.5 \rightarrow$ "Underweight"
- between 18.5 and 24.9 $\rightarrow$ "Normal"
- between 25 and 29.9 $\rightarrow$ "Overweight"
- $\geq 30 \rightarrow$ "Obese"

5. **Discount Eligibility**: Ask for total_bill and is_member ("yes" or "no"). Apply discount:

- If total_bill ≥ 1000 and is_member == "yes" $\rightarrow$ 10% off
- If total_bill ≥ 1000 but not member $\rightarrow$ 5% off
- Else $\rightarrow$ No discount Print final amount and discount message.

semicolon

6. **Quadrant Finder:** Ask for two integers x and y . Print:

- "Q1" if $x > 0$ and $y > 0$
- "Q2" if $x < 0$ and $y > 0$
- "Q3" if $x < 0$ and $y < 0$
- "Q4" if $x > 0$ and $y < 0$
- "Origin" if both zero
- "X-axis" if $y == 0$ and $x \neq 0$
- "Y-axis" if $x == 0$ and $y \neq 0$

semicolon _____

7. **Rock-Paper-Scissors (One Round)**: Ask Player 1 and Player 2 to enter: "rock", "paper", or "scissors" Print:

- "Player 1 wins"
- "Player 2 wins"
- "Tie" Use nested if-else.

Hint: 1. Rock beats Scissors loses to Paper
2. Paper beats Rock but loses to Scissors
3. Scissors beats Paper but loses to Rock

8. **Vowel or Consonant**: Ask for one letter. Print "Vowel" if it is a, e, i, o, u. Else print "Consonant". If not a letter, print "Invalid input".

semicolon _____

THANKS!

Hope that was fun?
